Our Services
The Laser Institute of Georgia offers over 20 lasers to accomplish the following:

- Reduction of fine lines & wrinkles
- Skin tightening & collagen rebuilding
- Tattoo Removal
- Facial & leg vein elimination
- Acne treatment and scar repair
- Brown spot and freckle elimination
- Birthmark and hyperpigmentation removal
- Hair Removal (available through our hair removal center)
Perfecta™ Laser by Candela
- Used to treat redness and flushing associated with rosacea, facial veins, wrinkles, port wine stain birthmarks, hemangiomas (redspots), angiomas (cherry red moles), venous lakes, and poikiloderma
- Features advanced micropulse technology and our patented Dynamic Cooling Device™ to minimize downtime
- Can reduce the appearance of some scars and stretch marks

Diolite® Laser by Iridex
- For the treatment of small spider-like vessels on the face, very small angiomas and red spots, as well as very small brown freckles, moles, keratosis, and skin tags
- Used to treat dermatosis papulosa nigra (DPN), dark growths located around the eyes in patients of color

AlexTriVantage™ by Candela
- Effective treatment for the lightening and eventual removal of tattoos and pigmented lesions such as: freckles, melasma markings, dermal nevi, and other birthmarks
- Superb ability to treat isolated areas of pigmentation without damaging surrounding tissue

Q-switched Nd: YAG Spectra™ by Lutronic
- A high quality light beam primarily used for tattoo removal
- Emits a focused beam of light that passes through outer skin layer to be absorbed by tattoo ink, breaking it into tiny particles that are gradually absorbed into the skin
- Effective for treatment of deep pigmented birth marks (nevus of OTA), acne scars, pigmented and drug induced pigmentation, and for suppression of melasma

RD-1200™ Ruby (QSR) Laser by Spectrum
- Most effective treatment available for the removal of benign pigmented lesions on both the dermis and epidermis
- Used to treat freckles, tattoos (green, most shades of blue, and brown ink), brown sun spots, and café-au-lait and nevus of OTA birthmarks

Please contact us to learn about the additional laser and light systems offered at Dermatology Associates of Atlanta.
**Fraxel Re:store™ Laser**

by Reliant Technologies

- Works by producing thousands of tiny, deep columns of microthermal treatment zones – eliminating old epidermal pigmented cells and penetrating deep into the dermis
- Fraxel® is unique in that it leaves surrounding, healthy tissue intact – allowing the skin to heal faster, creating healthy, new, tighter tissue
- FDA approved for treatment of wrinkles, age or sun spots, melasma, rough or uneven skin texture, and acne scarring

**PicoSure™ Laser** by Cynosure

- A picosecond laser used for removal of tattoos and benign pigmented lesions
- Effectively removes difficult and dark tattoo ink such as blue and green
- Fewer treatments needed for removal than other lasers through ultra-short pulse bursts of energy

**Ultrafine™ Erbium Laser** by Coherent

- A cold ablation resurfacing laser used to smooth down and flatten the raised edges of scars, syringomas, and benign raised moles

**Ultrapulse 5000C C02 Laser**

by Lumenis

- Used for facial resurfacing to smooth out lines, wrinkles, and scars, to remove brown spots and other irregularities including the surgical excision of keloid scars and superficial basal and squamous cell carcinomas

**GentleYAG™ Laser** by Candela

- For the treatment of fine lines and wrinkles, deep blue veins on the face, acne scars and skin tightening
- Non-ablative treatment that avoids damage to healthy skin cells and promotes collagen growth

**Smart Xide DOT™ Laser**

- DOTTherapy™ reverses the appearance of aged and sun damaged skin, improves skin texture and laxity, smooths wrinkles, and reduces the appearance of acne and other scars
- Creates thousands of microscopic perforations in a “dot” pattern, which induces immediate skin tightening and stimulates collagen growth, allowing the skin to heal more quickly
**Smoothbeam™ Laser** by Candela
- First device to specifically target the root cause of acne, the sebaceous gland
- Used to treat acne, improve the look of acne scars, reduce oil in the skin, stimulate the natural collagen in your skin, and soften fine lines and wrinkles around the eyes
- May be used to target individual enlarged glands (sebaceous hyperplasia)

**Isolaz™ Laser Therapy** by Soltamedical
- Primarily used for acne, this modality combines vacuum and painless broad spectrum light to deep clean and purify pores, alternative to pills or harsh medicines
- Laser portion rids face of some unwanted hair and prevents future acne breakouts by penetrating deep into the layers of the dermis

**Gentlewave Laser** by BioScience
- A yellow light source used to aid in healing after a procedure

**Allumera®**
- Cream activated by light to improve the appearance of the skin, reduce signs of aging, and minimize the appearance of pores with minimal downtime

**PDT**
- Photodynamic Therapy utilizes a topical sensitizer (ALA, MAL) applied to the skin followed by light to treat multiple actinic keratoses (precancers) but also early skin cancers and acne scars

**LED Light Therapy**
- Red and yellow wavelengths of light are applied topically to the skin of the face to dry excess oil and kill bacteria to reduce the appearance of existing acne
- Mild nature of treatment appropriate for a variety of skin types
- Photomodulation with LED increases collagen for wrinkle reduction and reversal of photoaging

**IPL** by Lumenis
- Intense Pulse Light is the broad-spectrum light primarily used for hair removal, also works well on vascularity and pigmentation
- Light source for Fotofacial®
The Laser Institute of Georgia, a long established division of Dermatology Associates of Atlanta, P.C., specializes in dermatological procedures using the latest, most effective laser technologies.

With more than 25 years of experience and over 20 medical lasers in our laser institute, we will provide you with safe and effective skin care from head to toe - providing you with a rejuvenating treatment plan designed for your individual needs.
Additional Services Available

The board certified physicians at Dermatology Associates of Atlanta and the experienced, patient-friendly medical team at their side offer a broad range of cosmetic and dermatologic services to meet your every need:

**Medical Spa Services**

At Skin Medics™ Medical Spa, our board certified dermatologists and experienced physician assistants and medical aestheticians will pamper you with the latest facial rejuvenation techniques and work together to meet your every skin care need. We offer microdermabrasion, facials, chemical peels, and other facial treatments to correct fine lines and wrinkles and keep you looking young. We also carry over 100 skin care products which can be ordered in-person or on our website for your convenience.

**Vein Elimination & Hair Removal**

Our certified clinical electrologist works to choose the best treatment for your needs. Our center offers Fotofacials for imperfections resulting from sun damage, as well as symptoms of rosacea, broken veins, and capillaries on the face, neck, and chest. The Atlanta Center for Veins & Hair Removal specializes in the treatment of leg and facial veins with multiple laser options, along with traditional sclerotherapy vein injections, and offers a range of hair removal technology to treat all hair and skin types, with most patients seeing permanent hair removal results after 3-6 visits.

**CoolSculpting®**
Reserved for patients with small localized areas of fat, Cryolipolysis™ is a non-invasive surgical procedure with no downtime

**Slim Lipo™**
by Palomar
Uses ideal laser wavelength to selectively melt fat and tighten surrounding skin to aid tumescent liposuction

**Ulthera®**
Facial Skin Tightening
Utilizes ultrasound to tighten and firm sagging facial skin. Bypasses surface to treat deeper layers safely

**miRaDry®**
by Mirama Labs
Uses microwave technology to permanently eliminate sweat glands which contribute to embarrassing sweat stains and underarm odor

Dermatology Associates of Atlanta also offers injectables including Botox®, Dysport®, Restylane®, Sculptra®, Juvéderm®, Radiesse®, Perlane®, and Belotero®.
Our goal at The Laser Institute of Georgia is to bring out and maintain your healthy, youthful-looking skin. Contact us to start developing your treatment plan today.
