Perfecta™ Laser by Candela

- Used to treat redness and flushing associated with Rosacea, facial veins, wrinkles, port wine stain birthmarks, hemangiomas (red spots), angiomas (cherry red moles), venous lakes, and poikiloderma
- Features advanced micropulse technology and our patented Dynamic Cooling System™ to minimize downtime
- Can reduce the appearance of some scars and stretch marks

Smoothbeam™ Laser by Candela

- First device to specifically target the root cause of acne: the sebaceous gland
- Used to treat acne, improve the look of acne scars, reduce oil in the skin, stimulate the natural collagen in your skin, and soften fine lines and wrinkles around the eyes
- May be used to target individual enlarged glands of the face for overall oil control

Isolaz™ Laser Therapy By Soltamedical

- Reduces appearance of existing acne on all skin types with Photopneumatics ™ technology; combining suction and light therapy, Isolaz™ rids the skin of pore-clogging debris and kills residual acne-causing bacteria deep within the pores
- Laser portion rids face of some unwanted hair and prevents future acne breakouts by penetrating deep into the layers of the dermis

GentleYAG™ Laser by Candela

- For the treatment of fine lines and wrinkles, deep blue facial veins, and skin tightening
- Non-ablative treatment that avoids damage to healthy skin cells and promotes collagen growth

HGM Krypton Laser

- For the treatment of small spider-like vessels on the face, very small angiomas and red freckles, as well as very small brown freckles

Medlite® IV YAG Laser by Hoya ConBio

- Primarily used for tattoo removal (multiple treatments may be needed)
- Emits a focused beam of light that passes through outer skin layer to be absorbed by tattoo ink, breaking it into tiny particles that are gradually absorbed into the skin
- Also effective for the treatment of birthmarks, Nevus of OTA, Mongolian spots, and café-au-lait birthmarks

RD-1200™ Ruby (QSR) Laser by Spectrum

- Most effective treatment available for the removal of benign pigmented lesions on both the dermis and epidermis
- Used to treat freckles, tattoos (green, most shades of blue, and brown ink), brown sun spots, and café-au-lait and Nevus of OTA birthmarks

The Laser Institute of Georgia has an ever-expanding selection of laser technologies and over 20 years of experience performing hundreds of thousands of laser procedures.

AlexTriVantage™ by Candela

- Effective treatment for the lightening and eventual removal of tattoos and pigmented lesions such as: freckles, Melasma markings, Dermal Nevi, and other birthmarks
- Superb ability to treat isolated areas of pigmentation without damaging surrounding tissue makes treatment appropriate for face and body applications

Ultrafine™ Erbium Laser by Coherent

- A cold ablation resurfacing laser used to smooth down and flatten the raised edges of scars, syringomas, and benign raised moles

Smart Xide DOT™ Laser

- Creates thousands of microscopic perforations in a "dot" pattern, which induces immediate skin tightening and stimulates collagen growth, allowing the skin to heal more quickly
- DOT Therapy™ reverses the appearance of aged and sun damaged skin, improves skin texture and laxity, smooths wrinkles, and reduces the appearance of acne and other scars

Ultrapulse 5000C CO2 Laser by Lumenis

- Used for facial resurfacing to smooth out lines, wrinkles, and scars, to remove brown spots and other irregularities including the surgical excision of keloid scars and superficial basal and squamous cell carcinomas

Fraxel Re:store™ Laser by Reliant Technologies

- Works by producing thousands of tiny, deep columns of microthermal treatment zones – eliminating old epidermal pigmented cells and penetrating deep into the dermis
- The Fraxel® is unique in that it leaves surrounding, healthy tissue intact – allowing the skin to heal faster, creating healthy, new, tighter tissue
- FDA approved for treatment of wrinkles, age or sun spots, melasma, rough or uneven skin texture, and acne scarring

Gentlewave Laser by BioScience

- A yellow light source used to aid in healing after a procedure

Pellevé™ By Ellman International

- Instead of laser technology, this facial rejuvenation treatment uses radio waves to emit heat energy that causes collagen within the skin of the face and eye area to contract and firm; producing smoother, tighter skin and boosting collagen growth.
- FDA approved for the non-invasive treatment of mild to moderate facial wrinkles.
- Treatment available through several DAA specialty centers. Inquire with the Laser Institute of Georgia's staff to determine which center can meet your wrinkle-reduction needs best.

LED Light Therapy

- Red and blue wavelengths of light are applied topically to the skin of the face to dry excess oil and kill bacteria to reduce the appearance of existing acne
- Mild nature of treatment appropriate for a variety of skin types

Please contact us to learn about the additional laser and light systems offered at Dermatology Associates of Atlanta.

Laser Institute of Georgia, a long established division of Dermatology Associates of Atlanta, P.C., specializes in dermatological procedures using the latest, most-effective laser technologies.

With more than 25 years of experience and over 15 medical lasers in our laser institute, we will provide you with safe and effective skin care from head to toe - providing you with a rejuvenating treatment plan designed for your individual needs.

Additional Services Available

The board-certified physicians at Dermatology Associates of Atlanta and the experienced, patient-friendly medical team at their side offer a broad range of cosmetic and dermatologic services to meet your every need:

Skin Medics™ Medical Spa

At Skin Medics™ Medical Spa, our board certified dermatologists and experienced physicians' assistants and medical aesthetic ians will pamper you with the latest facial rejuvenation techniques and work together to meet your every skin care need. We offer microdermabrasion, facials, chemical peels, and other facial treatments to correct fine lines and wrinkles and keep you looking young. We also carry over 100 skin care products which can be ordered in-person or on our web site for your convenience.

Atlanta Center for Veins & Hair Removal

With the help of our registered nurse and certified clinical electrologist, we work together to choose the best treatment for your needs. Our center offers Foto Facials for imperfections resulting from sun damage, as well as symptoms of Rosacea, broken veins and capillaries on the face, neck, and chest. The Atlanta Center for Veins & Hair Removal also specializes in the treatment of leg veins with multiple laser options, along with traditional sclerotherapy vein injections, and offers a range of hair removal technology to treat all hair and skin types, with most patients seeing permanent hair removal results after 3-6 visits.

Dermatology Associates of Atlanta also offers injectables including Botox®, Dysport®, Restylane®, Sculptra®, Juvéderm™, Radiesse®, and Perlane®.

DERMATOLOGY ASSOCIATES OF ATLANTA, P.C.
